

# What is a Masters with Advanced Practice?

A Masters with Advanced Practice is a 21-month programme that allows you to gain a qualification in a specific area of practice. It is designed for those who have a relevant undergraduate degree and want to develop their skills and knowledge in a particular area. The programme is delivered through a combination of lectures, seminars, and practical sessions. You will also have the opportunity to undertake a research project or placement. The programme is accredited by the relevant professional body and will enable you to progress to a higher level of practice.

- Enhance your employability
- Improve your CV
- Put theory into practice
- Network with key contacts
- Reflect on your experiences
- Gain real-world experience
